Your future

is shaped by the things you do today. Your career will be shaped by the skills and experiences you have during high school and college. Choosing a Center of Excellence program will ensure that you are building a foundation for your future success.

Our goal is to provide you with the information, access and preparation you need for college. These programs are designed to give a blend of hands-on experience with your classroom instruction. The things you learn in class will be the things expected of you in your career. These programs are a great way to gain industry exposure and be sure you are making the right choice for you.

GET STARTED

We suggest that you explore the career programs on this website and talk to your parents about lifestyle, work/life balance and benefits of careers in your chosen field. Make sure you talk with your school counselor about the differences in credit offerings and transfer options in the Center of Excellence you choose.

We look forward to being the starting point of your career path!
